

**NAME**

screenmk - precompiler for httpscreen configuration files

**SYNOPSIS**

```
screenmk [srcfile [dstfile]]
```

**DESCRIPTION**

The `screenmk` utility is used to compile and check the httpscreen screening files: `httpscreen.cf(5)`. The `httpscreen(8)` daemon uses precompiled the screening files.

**FILES**

`/usr/local/etc/local/httpscreen/screenmk`

The `screenmk` utility program itself.

`/usr/local/etc/local/httpscreen/httpscreen.cf`

The source screening file.

`/usr/local/etc/local/httpscreen/local`

Directory for local add-ons (optional).

**SEE ALSO**

`httpscreen(6)`, `httpscreen.cf(5)`,

**BUGS**
